

MOHAMED APSAR

Chennai, Tamil Nadu, India

Phone: 8637654866 | Email: mohamed@gmail.com | LinkedIn: linkedin.com/in/mohamed-apsar | GitHub: github.com/mohamed-apsar

PROFESSIONAL SUMMARY

Highly motivated and results-driven Python Developer with a strong foundation in building scalable backends, integrating advanced AI capabilities, and developing full-stack web applications. Proven ability to design secure RESTful APIs, manage databases, and architect innovative software solutions. Passionate about writing clean, efficient, and maintainable code to solve complex technical challenges and deliver business value.

TECHNICAL SKILLS

Programming

Languages: Python, JavaScript, TypeScript, SQL

Frameworks &

Libraries: Django, FastAPI, Flask, Node.js, Express, React

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Tools &

Technologies: Git, Docker, RESTful APIs, Google Gemini API integrations, Postman

PROFESSIONAL EXPERIENCE

Zaion Digital Solutions

Present

Founder & Lead Developer | Chennai, India

- Spearhead the development of custom IT and AI solutions for local businesses, overseeing the complete software development lifecycle from concept to deployment.
- Design and implement robust Python-based backend systems to support dynamic, client-facing web applications.
- Architect integrated digital marketing workflows and promotional platforms to enhance local business reach and user engagement.

KEY PROJECTS

AI-Powered Career Mentor & Learning Path Generator

- Developed a scalable backend using **Python and FastAPI** to dynamically generate customized career roadmaps based on user inputs and market trends.
- Integrated the **Google Gemini API** to analyze user skills and automatically recommend personalized, multi-stage learning plans (e.g., 100-day discipline and habit-tracking routines).
- Designed RESTful endpoints to seamlessly deliver structured AI responses to a modern React frontend dashboard.

Real-Time Collaborative Code Editor Backend

- Engineered a highly responsive backend using **Python and WebSockets** to support a multi-language collaborative code editor for seamless remote pair programming.
- Implemented secure code execution sandboxes and state-synchronization protocols to handle concurrent user inputs in real-time.
- Connected the backend to a Supabase database for persistent session storage and user authentication management.

ShopSphere - E-Commerce API Architecture

- Designed and deployed a secure, high-performance RESTful API using **Django REST Framework (DRF)** to power a full-stack e-commerce platform.
- Modeled relational databases using **PostgreSQL** for complex product catalogs, user profiles, inventory management, and transaction histories.
- Implemented token-based authentication (JWT) and custom permission classes to ensure data security and prevent unauthorized access.

EDUCATION

AMS College

Chennai, India

Bachelor of Engineering / Technology

CGPA: 7.8

St. Mary's Anglo Indian Higher Secondary School

Chennai, India

Higher Secondary Education

NxtWave CCBP 4.0

Online

Intensive Full-Stack & Software Development Program
